Date Codes on early models are stamped on the lead reservoir in a 6-digit (sometimes 5-digit) code: yymmdd. If 5 digits, add a 7 as the leading digit. Later models use the 2 character code, that is lightly pressed into the body, at the end of the text on the side.

Mold Marks are on the body, just below the cap. One side says Pentel, the other side says Japan and a number (the mold mark).

Prior to the 5th Generation (pictured above - produced in the 80's to end of life), the P325, P327 & P329 pencils were produced without any text on them.

The P327 & P329 were produced both in Black and their appropriate colors.

The P323 began being produced in the late 70's with text printed on the side.
