

# Sigil Update

06.13.2018

## 1. Last Week

### *New Token Development*

- This week we finished all major coin functionality and wrote extensive tests for all functionality. Loom is releasing the final pieces to their SDK at the end of this week which will let us put the final touches on the token and ***start the coin swap sometime next week!***

### *Sigil Swap Website*

- We finished the Sigil swapping website. As soon as we finalize the coin, the swap will begin and all Sigil holders will be able to swap to the new version of Sigil. The process of how to swap will be detailed in an upcoming Medium article

The screenshot shows the 'Swap Legacy Sigil to ERC20 Sigil' page. At the top left is the Sigil logo. At the top right are navigation links for 'Coin Swap', 'About', and 'Contact'. The main header is purple with a stack of coins icon and decorative geometric shapes. Below the header, the page title is 'Swap Legacy Sigil to ERC20 Sigil' with the subtitle 'We help make it simple'. A progress bar is labeled 'PROGRESS'. The first step is '1/5 Here's how this works'. The text explains that there are two Sigils: the old one on its own blockchain and the new one as an ERC20 token on Ethereum. It states that the community is abandoning the old chain for the new ERC20 Sigil, and users need to swap their old Sigil for the new one at a 1:1 ratio. A checkbox is present with the text 'I have read the above, agree to the terms, and want to continue.' and a 'Forward >' button at the bottom right.

### *PR Outreach Deal Sealed*

- We sealed a deal with the PR firm discussed last week. After Sigil Launch is live, they will use their vast network to help us reach out to over 100 publications. These outreaches will lead to more exposure and publicity for Sigil and its up and coming DApp products.

### *Re-Writing White Paper*

- We've been re-writing the white paper to truly reflect the new direction of Sigil. This will be published at the start of the coin swap.

### *Coin Swap Medium Article*

- We've decided to release the coin swap Medium article with the release of the swap site and new token.

## **2. Next Week**

- ★ Start work with the PR Firm crafting the message and avenues for our new launch.
- ★ Publish Medium article detailing the process and details of the coin swap.
- ★ Launch the new token to the main net and begin the coin swap.

- *Team Sigil*
