

Who We Are

We believe climate change is the most significant systemic threat to humanity in the 21st century – and represents one of the most meaningful investment opportunities in history. Guided by this worldview, we formed Homecoming Capital as a sustainability-focused investment firm dedicated to decarbonizing our economy through thoughtful capital deployment. We invest in new and established technologies and infrastructure alongside mission-aligned partners in the four industries that contribute the most to carbon dioxide and other greenhouse gas emissions: (i) power generation, (ii) transportation, (iii) agriculture, and (iv) construction / manufacturing.

Your Impact

Our firm is seeking a high performing and entrepreneurial fall intern who is passionate about receiving hands-on experience working closely with the two founding partners in a dynamic, sustainability-focused investing environment. The internship will focus on researching major sustainability themes with the goal of generating actionable investment theses.

Position Responsibilities

The role requires an individual contributor able to effectively operate in a fluid and fast-paced environment thinking as both an entrepreneur and an investor. Responsibilities will include:

- Completing fundamental market and industry research on sustainability topics
- Preparing written and presentation materials summarizing major research findings
- Supporting partners with relationship and deal sourcing

Firm Values

Our core values are crucial in guiding our vision of becoming a world-leading sustainability investing firm. We seek partners on our journey who deeply embody these values:

- *Integrity*: we form relationships based on trust, honesty, and long-term partnership
- *Intellectual curiosity*: we embrace a growth mindset, with a willingness to explore new concepts, reach independent conclusions, and challenge the status quo through action
- *Sustainability*: we pursue relationships, partnerships, and investments oriented towards long-term resiliency
- *Purpose*: we recognize that our collective journey is greater than any individual contribution, necessitating a low-ego approach

Fall Internship – Homecoming Capital 2020

Candidate Requirements

- Bachelor's degree from leading university with outstanding academic track-record
- Demonstrated desire to work in (i) investing and (ii) sustainability
- Expertise in MSFT Office Suite, including strong presentation and financial modeling skills
- Demonstrated experience in one or more of the following: (i) building efficiency, (ii) natural climate solutions, (iii) terrestrial / maritime electrification, (iv) distributed energy resources, (v) smart grids, and/or (vi) carbon credit markets
- Team player: we're a close team of independently motivated high performers
- Intellectually curious: we're seeking a deep thinker with a desire to work in a high leverage position on one of the most significant intersectional problems our society has ever faced
- Strong attention to detail: we trust you to manage your own work
- Builder: we're constantly reevaluating our processes and hope you'll critically and creatively help us improve
